

Physics Department - Bar-Ilan University - 2022-2023

MS.c - Biophysics

Course number	Course name	Semester Hours			Semester A - points	Semester B - points
		Lecture	Exercise	Lab/Seminar		
86-830	Advanced Seminar			2		1
86-9410	Colloquium			2;2	0	0
86-9510	Colloquium in Biophysics			2;2	0	0
86-762	Master's Thesis			0	0	0
Mandatory courses						1
Elective courses						12
				Mandatory and elective courses	13	13

Total credits	13
----------------------	-----------

For your attention:

With a written recommendation of the program's Heads , you can register to courses for undergraduate studies from the departments Chemistry and Life Science which is not from the courses list.

Students who have already taken a mandatory course from the above courses as part of their undergraduate studies, will have to take another course from the list of postgraduate courses in order to reach a total of at least 13 credits.

Each student must take part in a Colloquium in Biophysics in each year of the degree, in addition to the colloquium and teaching (without credits).

In most elective courses there is a difference between the number of frontal hours and the number of credits given. Degree requirements are defined by credits (see course list).

In addition to the above, every student must take an exemption exam in English and basic courses in Judaism - details can be found in the student information booklet or on the university's website.
